

# THE CHINOOK ADVANCE

Vol. 22

Chinook, Alberta. Thursday, April 13th 1944

## THE CONFUSED ISSUE

Two ballots are to be used in the voting on the Municipal Hospital Scheme on April 19. 1—Do you approve of the Municipal Hospital Scheme? Yes

No

11—Do you want the Hospital located in Cereal? Do you want the Hospital located in Oyen?

In each case the voter marks each ballot with an X opposite his choice.

But if anyone will look at the map and remember which areas are most thickly populated, there obviously the majority of votes for location will be for Oyen, and a straight majority carries this question, that is anything over 50 per cent decides location. Therefore if you vote Yes for the scheme and Cereal for location the Municipal Hospital will still be in Oyen. If you want to keep the hospital in Cereal you must vote No for the scheme and vote Cereal for location.

The real issue before the people in this voting is:

A Do you want to spend \$50,000 on a new hospital in Oyen as a municipal affair?

B Or do you want to maintain the Esler Hospital at Cereal as it is now fully paid for. Obviously this hospital would go broke if there were a Municipal Hospital in Oyen, supported by our taxes.

111—It takes two thirds majority vote to pass the municipal hospital scheme and we can defeat that if we want to. It is up to you to exercise your wishes by voting. The Oyen people certainly shall.

If you want to keep your hospital in Cereal you must vote NO for the scheme. If you want a municipal hospital in Oyen vote YES for the scheme.

While the Esler hospital was being built Oyen was petitioning for a hospital in Oyen. A municipal Hospital district was created, the boundaries of

## We Can Do Better

IN the past, wars have brought with them a high cost of living, ending with inflation.

This sapped the strength of nations and added poverty and injustice to the other tragedies of war.

Later it has led to falling prices and unemployment.

In this war, we Canadians are determined to head off this danger.

We have done much to avoid a repetition of the disastrous price rises of previous wars. We have paid higher taxes. We have bought Victory Bonds. We have severely limited profits.

We have put a ceiling on prices. And to make it possible to hold the ceiling, wages and salaries have been controlled.

In one way or another most increased costs have been absorbed and very few passed on to the consumer.

Holding the ceiling has been a struggle. But the results have been worth while. From 1914 to 1919 prices rose 60%. From 1939 to 1944 the rise has been only 18%.

This effort of the Canadian people has been successful enough to be noted in other countries.

But we must continue to hold the line. We need not let history repeat itself. We can do better.

### We can all help—

By cutting down unnecessary spending, and buying Victory Bonds instead.

By not hoarding or buying in black markets.

By not taking advantage of the war situation to press claims for higher prices, higher wages, higher rents or higher profits.

(This advertisement is one of a series being issued by the Government of Canada to emphasize the importance of preventing a further increase in the cost of living now and deflation later.)

## Britain's Airfields

THE PRESENT ALLIED air offensive against German-held territory in Europe, is the greatest operation of its kind ever to be undertaken. News reports give us some conception of the large number of men and machines required for these mass attacks, but there are other important factors involved of which little is heard. In order to accommodate the fleets of aircraft which come and go day and night, many bases are needed, and for this reason Britain has been converted into what has been described as "one great airfield on the edge of occupied Europe." At one time the island of Malta was called "The Unsinkable Aircraft Carrier," and it is now suggested that Britain might justly claim that title. Outstanding achievements in engineering, organization and finance have been accomplished in providing accommodation for the ever-growing Allied air armada.

### Exact Number Not Revealed

The number of airfields located in Britain is, of course, not revealed. However, some interesting facts concerning them have been made public. Paved runways, perimeter tracks and hard standings are said to total 100,000,000 square yards, which would be equivalent to a road 9,000 miles long and thirty feet wide. The amount of ballast and cement required for constructing these facilities was 30,000,000 tons. Other materials authorized included 18,000,000 cubic feet of wood of all kinds, 336,000 miles of cables, 9,800 switchboards, and many other items. The costs reached gigantic proportions. In 1942, the money expended in this connection amounted to one-sixth of the national budget in peacetime. Included in this building program also, was the construction of a number of bases for the United States Army Air Force, carried out by the British government under a plan of Lend-Lease in reverse.

### Suitable Soil Hard To Find

Among the problems encountered was that of selecting sites for the large number of airfields which were needed. Britain is a very densely populated country, and great difficulty was found in locating open spaces sufficiently removed from other and from large centres of population. A further complication lay in the fact that much of the available space was swampy and that there were also considerable areas of peat land. Dry, level terrain is essential for airports, but in utilizing land of this nature, the amount of acreage devoted to the cultivation of food crops, an important part of Britain's war economy, had to be curtailed. Labour and transportation facilities, both of which are greatly restricted due to the war, were other obstacles overcome by the Air Ministry works department. Now completed, these airfields are providing part of the background for the mightiest air offensive of all time.

## "Regular" again after 2 weeks!

"I'm sure am happy to be able to give up all those pills and medicines for my constipation. They were mighty unpleasant. And expensive, too! I found, once I started eating KELLOGG'S ALL-BRAN that I was soon 'regular' again. I am most certainly pleased with the real relief it gives. I believe me!"

Yes, KELLOGG'S ALL-BRAN can really work wonders in cases of constipation due to lack of dietary "bulk." It gets at, and helps correct the cause, by supplying the "bulk-forming" material needed for easy, natural elimination! Try eating a serving daily, with milk, or sprinkled over other cereals! Or, eat several ALL-BRAN muffins daily. Drink plenty of water! See if you, too, don't find welcome relief! Get KELLOGG'S ALL-BRAN at four grocers today—in 2 convenient sizes.

### Marvelous Technique

British Gun Crews Shoot Down Nazi Plane At Altitude Of Four Miles The skill of the British anti-aircraft gun crews, as well as weapon performance, has immensely increased since 1940. The crews are trained and re-trained in grueling gunnery courses. One Me410 which circled the coast north of London by night and was met by heavy anti-aircraft fire was shot down in pitch darkness from an altitude of over four miles with only 30 rounds.

### FIGHTING ON ALL FRONTS

The British Army has fought in almost every corner of the globe—Norway, France, Holland and Belgium, Egypt, Eritrea, Abyssinia, Somaliland, Madagascar, Syria, North Africa, Persia, Sicily, Italy, Greece, Crete, Malaya, Burma and Hong Kong.

### If you suffer MONTHLY FEMALE PAIN

You who suffer cramps, headache, backache, and nervous feelings—due to female functional disorders—should try Lydia E. Pinkham's Vegetable Compound. It has a soothing effect on one of women's most important organs. Also, it is the stomach tonic! Made in Canada. Worth trying.

### From Wrecked Bombers

Detroit Soldier Uses Plastic Glass To Replace Watch Crystals

Japanese planes that fall to Australian and Allied airmen in the southwest Pacific are a gift from the gods to Pte. Ted S. Malin, 31, of Detroit. Huge quantities of plastic glass are removed from the wrecked bombers and Zeros, and while many men carve the hard glass into rings and trinkets for their wives and sweethearts, Malin is much more practical. He was a magnet mechanic in Detroit and served as a jeweller's apprentice, and now he has set up a watchmaker's bench in his maintenance truck, and repairs 45 watches a week in his spare time.

Watch parts are difficult to obtain from the States, but he finds he is able to repair seven out of 10 watches. Crystals are also hard to get—but he doesn't need any. For months now he has used only one material—plastic glass from Japanese planes. "Cut with a hacksaw, treated with emery and sandpaper and polished—sometimes with tooth powder, the crystals are perfected," he says. "The fact that the new crystals came from Japanese planes makes them even more desirable."—Brandon Sun.

### CONVINCING ANSWER

Is Britain pulling her weight in the war. Here's part of the answer: So far the British Isles has lost 38,300 pilots and aircrew killed and 10,400 missing and have lost over 10,000 aircraft. Since the war started 41,000 officers and men of the Royal Navy have been lost—30 per cent. of its pre-war strength.

## Price Control And Rationing Information

Q—Do I still need to turn in a used metal tube when I buy tooth paste?

A—No, that order has been rescinded on account of the small amount of tin now being incorporated in new tubes. Consumers are asked, however, to continue to turn in their old tubes wherever possible so that their tin content may be recovered.

Q—Can I throw away my No. 3 ration book when the No. 4 book is issued?

A—Not if you wish to become eligible for canning sugar next summer, as the first 10 square "P" coupons in the No. 3 book are to be used for that purpose.

Q—My dealer will not sell coca cola in cartons. He says he cannot secure them, but still charges the same price without the carton. Is this correct?

A—Yes, this is correct, the manufacture of soft drink bottle carry-out cartons has been prohibited. There are still some in stock and those stores with supplies on hand naturally use them. Absence of the carton would not make any difference in the price of the beverage.

Q—What should one do when she has lost her ration book?

A—Apply to the nearest Local Ration Board or branch office of the Wartime Prices and Trade Board.

Q—My son is about to enlist for active service in the army. What should he do with his ration book?

A—When your son leaves your household to enter the services he is required to surrender his book to the army authorities. Please send your questions or your request for the pamphlet "Consumers' News" or the Blue Book (the young clerk in which you keep track of your rationing) to the nearest Wartime Prices and Trade Board office in your province.

## Step In Agriculture

Farm Factories Are Foreseen For The Post-War Future

The farmer of the post-war period will be an industrialist as well as a producer of raw materials for industrial purposes, Dr. Howard Doane, of St. Louis, predicts in Farm Journal.

Doane, the nation's leading professional manager of farms, with 350,000 acres under his supervision, says: "The next and biggest step in agriculture is establishment of fixed and movable processing plants, handling agricultural products grown near by which will extract, compress, dehydrate, refrigerate, concentrate, and fabricate these farm commodities."

Products which offer the best possibilities for processing in rural industries are those which are bulky, full of water, or perishable; or those where a large number of handlers have crowded between producer and consumer. Some of the processing will be done on individual farms, some by farmers' co-operatives, some by private companies, including rural branches of city industries.

Doane calls the new program "vertical diversification," explaining this to mean that, instead of raising many kinds of crops, known as "horizontal diversification," the farmer will concentrate on his most profitable crop, and make it as nearly ready for the consumer as he can—Scientific American.

## GEMS OF THOUGHT

### COMFORT

There is much satisfaction in work well done; praise is sweet; but joy can be no happiness equal to the joy of finding a heart that understands.—Victor Robinson.

The disposition to give a cup of cold water to a disciple, is a far nobler property than the finest intellect.—Howells.

A deserved and discriminating compliment is often one of the strongest encouragements and incentives to the different and self-distrustful.—Tryon Edwards.

God often comforts us, not by changing the circumstances of our lives, but by changing our attitude toward them.—S. H. B. Masterman.

Whatsoever things were written aforetime were written for our learning, that we through patience and comfort of the scriptures might have hope.—Romans 15:4.

Father, we thank Thee that Thy light and Thy love reach earth, open the prison to them that are bound, console the innocent and throw wide the gates of heaven.—Mary Baker Eddy.

The ice cream freezer was invented by Mrs. Nancy Johnson of Philadelphia, and more patent number 3245.

## Film Showing

Regina W.V.S. Is The First Centre In New Project

"The W.V.S. Centre in Regina is the first to train volunteers to operate 16mm film projectors in co-operation with the Volunteer Projection Service of the National Film Board" says a report from the Women's Voluntary Services Division, Department of National War Services, Ottawa. "Seventeen volunteers have taken the course and 39 more are on the waiting list. These trained operators will be of inestimable value to various women's groups. Training of women volunteers to operate these 16mm projectors so that more frequent daytime showings to women may be made in Regina is proving a valuable volunteer service in that city."

According to other reports, many Centres are becoming interested in what Regina has accomplished and plan to organize classes to train volunteers for this work, in order to enable them to have showings of films of consumer interest to various women's groups.

There are few volunteer jobs for which training is so essential as for some training—whether the job is of short or long duration. Peterborough, Ontario, evidently had this in mind for the W.V.S. Centre there co-operated in the planning of a Hostess Course. This course of training for volunteers was given in three lectures; the first dealing with personality and etiquette, including military etiquette, and the others with recreation and "You as a Hostess."

The Edmonton W.V.S. Centre has shown considerable interest in public speaking and volunteers have attended lectures on this art in the Edmonton Public Library. About 60 people attended each of the lectures.

## Helps Weed Prevention

Suggested Methods For Ridding The Land Of Weeds

The old adage that prevention is better than cure is particularly applicable to fighting weeds on the farm. Clean seed is the first essential. By having a clean seed bed on well drained fields as soon as they are fit for cultivation and by sowing clean plump seed of adapted varieties while the needed moisture is still in the ground, conditions will have been created for vigorous crops with capacity to fight weeds successfully, states Herbert Groh, Division of Botany, Dominion Department of Agriculture.

"The introduction of a variety of crops, differing in nature and culture, permitting early cutting in the case of hay or cultivation as regards corn or roots, will prevent weeds from maturing and at the same time do a service to the farmer himself. Rotation gives all fields the advantage of systematic cleaning, and after-harvest tillage and spring preparation for late crops dispense in great measure with the necessity of summer-fallow and reduce hoeing to a minimum."

## POLISH REFUGEES

Five thousand, seven hundred and fifty Polish refugees have found a haven from persecution and war in Uganda, British East Africa. The majority of them are women and children who have become, in the meantime, agriculturally self-supporting.

## FOR THE VANQUISHED

Prime Minister Jan Christian Smuts of South Africa said he hoped it would be possible "in peace to avoid mistakes of the last war and give even to the vanquished the needs of existence." He opposed, however, granting colonies to Germany.

Sharks of today are insignificant in size compared to their ancestors, which grew to lengths of more than 100 feet.

**"SALADA" TEA**

## Good Seed

Is A Factor In Keeping Land Free Of Weeds

Good seed is better able to fight weeds. To be certain of obtaining good seed, buy only certified or registered seed. These grades are derived from crops inspected in the field and for which certificates are finally issued by the Plant Products Division, Dominion Department of Agriculture. Certified Seed and Registered Seed are legal grades under the Seeds Act of Canada. A variety is accepted for registration only after it has been carefully compared with other varieties and found to be deserving of a place in some part of the Dominion.

Registration or certification of seed implies that the crop from which it has come must have been inspected in the field and found to have the required degree of purity of variety and kind. It must also be free from weeds and seed-borne diseases within certain limits. As pointed out by W. H. Wright, Chief, Laboratory Services, before seed can be sold as registered or certified, it must have been subjected to field inspection as well as a purity and germination test, and if up to a certain specified standard, it is tagged and sealed in accordance with the regulations prescribed by the Seeds Act.

## SMILE AWHILE

A young woman came in quite hurriedly after the muscle had begun.

"Have I missed much?" she asked. "What are they playing now?"

"The Ninth Symphony."

"Oh, goodness! Am I really as late as that?"

Man: "How much is this hat?" Clerk: "Fifteen dollars, sir."

Man: "Where are the holes?" Clerk: "What holes?"

Man: "The holes for the ears of the jackass that would pay that much for it."

Mr. B.—I think you are the finest looking man I ever saw.

Mr. C.—I'm sorry I can't return the compliment.

Mr. B.—You could if you told as big a lie as I did.

First Soldier: "What kind of pie is this?"

Second Soldier: "What does it taste like?"

First Soldier: "Glue."

Second Soldier: "Then it's apple. The cherry tastes like soap."

A soldier went into the barber shop after a 30-mile hike. He slumped into the chair.

"Give me a shave," he said. The barber told him he was too far down in the chair for a shave.

"All right," said the soldier wearily, "give me a haircut."

"My dear, surely you haven't spent all the afternoon at the Smith's?"

"Yes, Auntie. They said such things about everyone who left that I didn't dare come away."

Midge: "Jim's proposal was so sudden it made me jump."

Madge: "At it?"

"Have you really shown me everything you have in the shop?"

"Not quite, madam. We have an overdue account of yours on our books, if you would care to see it."

Mike: "This fine kid you have there. A magnificent head and noble features. Say, could you lend me a couple of dollars?"

Pat: "I could not. 'Tis my wife's child-aby her first husband."

"Oh, mamma, won't you buy me a new dress for my doll?"

"But why, child?"

"Yesterday I quarrelled with her and today we've made it up and now I must give her a new dress."

Daniel Webster, as American secretary of state, was the first to warn other nations to keep out of the Hawaiian Islands.

## Concert Singer

Officer Ishbel Mutch Is Entertaining Troops Overseas

Crossing the ocean is no novelty to Section Officer Ishbel Mutch of the R.C.A.F., who is in Britain with the Women's Division. After she completed her school days in Regina, she travelled for several years in Europe, studying music in its great centres. Later, she left a distinguished career in New York's concert and radio world to enlist in the Women's Division, where her soprano was a highlight of service concerts from coast to coast. Now, she is continuing her work of concert singing for Canada's service men and women overseas.

Section Officer Mutch, who made her concert debut in Berlin before the war, hopes to give a concert and sing in the city before she crosses the ocean again on her way back to Canada.

## For Eczema—Skin Troubles

Make up your mind today that you are going to give your skin a real chance to get well. Go to any good drugstore today and get an original bottle of Monon's Eczema Oil—it has many days because it is highly concentrated. The very first application will give you relief—the itching of Eczema is quickly relieved—eruptions dry up and scale off in a very few days. The same is true of itching Toes and Feet, Barber's Itch, Salt Rheum and other skin troubles. Remember that Eczema has a grossy nature. Complete satisfaction or money back.

## At Bar Of Justice

Lord Haw Haw Will Be Tried In British Courts

"Lord Haw Haw" and other Britons broadcasting for Germany will be tried in British courts after the war, Deputy Prime Minister Clement R. Attlee told the British Commons.

Asked by Maj. Ernest Lloyd, Conservative, whether these broadcasters would be considered war criminals, he replied:

"These individuals will not be included in the category of war criminals but will be charged with offenses against British law and brought to trial in the appropriate British court."

Columbus in 1492 described sweet potatoes he found in the western hemisphere as resembling carrots with "a savor of chestnuts."

## Improve Your Health by Correcting Sluggish KIDNEYS

This Way Is Swift, Economical

Few conditions can wreck your health faster than diseased kidneys and inflamed bladder. Your back aches miserably. You have restless nights. You suffer leg cramps and rheumatic pains. When these happen your kidneys need help. Get rid of acid, and poisonous wastes that are undermining your health.

Give them this help—quickly—with GOLD MEDAL Haarlem Oil Capsules. GOLD MEDAL Capsules contain accurately measured amounts of the original and genuine Haarlem Oil (Dutch Drops). You will be greatly surprised at the way they relieve clogged kidneys and irritated bladder. Go to your drugist now and get a 40c box. Be sure you ask for GOLD MEDAL Haarlem Oil Capsules.

## GARDEN NOTES

### Buying Plants

For quick results, the use of started or bedding plants will help. These may be secured from the nearest seed firm or florist or professional gardener. They are plants from seed sown indoors usually in a hotbed or greenhouse, and are well grown when set outdoors as soon as danger from frost is over. They now come in a great variety of both flowers and vegetables.

Only by the use of certain started plants it is possible to get flowers and vegetable maturity in some parts of Canada. Petunias, for instance, would hardly reach blooming stage from seed outdoors. The same is true of tomatoes, and possibly of cabbage and other things. In transplanting them from the flats or baskets in which we buy them, one should water well, and if the sun is hot it is a good thing to provide a little shade for a day or two. Also, if these plants are in flower or are very tall, it is advisable to snip off flowers and pinch back main stems to encourage stocky growth.

**Speed Up Hints**  
There are various little ways the experienced gardener uses to hasten things along. With tiny seeds like those of lettuce, onions, etc., sowing will be more economical and need less arduous thinning if the fine seed is mixed with a little sand and the mixture spread thinly along the rows. Allow potatoes to sprout in a sunny, warm room for a week or two and see that sprouts are broken off in planting. Soak the seeds of beans, peas, beets, corn, etc., before planting. For tender and crisp vegetables, the seeds should be kept speeded. If because of neglect, drought or any other reason growth is allowed to halt for a few days then tough, woody fibre results and both flavor and texture are impaired.

Professional gardeners get quick, tender growth by pushing things along. They use a good deal of fertilizer, cultivate at least once a week, and more often in dry weather, and they give their vegetables plenty of room for development. This means such things as carrots, radishes and beets, etc., are thinned from two to four inches apart, and when this space is filled one can start harvesting every other plant, leaving the rest for further development.

Another way the professionals ensure tenderness is to have their vegetables coming along in succession. They would not think of planting all their carrots, beets, beans or anything else at the same time. They spread sowings over several weeks. In most parts of Canada one can go on planting carrots, beets, beans and other things right up to the middle of July, thus ensuring a continuous supply of the highest quality young vegetables, until frost.

ALWAYS DEPENDABLE WRAPPED AIRTIGHT TO ENSURE POTENCY

### Muskrat Crop

Thousands Of Trappers Are Engaged In A Lucrative Business

All winter long our streams and marshes have lain silent, and still under the grip of ice and snow. But with the approach of spring these quiet places are becoming the scene of intense activity. Thousands of trappers are beginning the spring harvest of Canada's \$2,500,000 muskrat crop.

Clad in warm clothes and hip boots, the hardy trapper braves the raw winds and cold waters in the early morning to discover what Lady Luck has brought to his trap-line. This is the first step in a chain of events which will result in warm and beautiful coats for my lady of fashion. The fur of the muskrat is soft and durable and the furrier presents it to the public in many pleasing forms. It is used extensively in its natural, undyed state. One of the most popular processed forms is known as Hudson Seal. A special exhibit at the Royal Ontario Museum shows the various steps by which the long-haired, brown pelt of the muskrat is converted into short-haired, glossy black Hudson Seal. Muskrat is also processed to resemble other furs such as mink, or fur-seal. However, the problems of processing and fashion are for the furrier. They do not concern the busy trapper as he harvests his spring crop, racing, not as the farmer does against the advent of frost and snow, but against the approach of warm weather which renders the pelt of the muskrat unprime and commercially inferior.

### Britain Supplies Maps

Royal Engineers Responsible For Production For The Armed Forces

Britain has, for years, been a producer of first-class maps, and has been able to supply a great amount of expert experience to keep the British Army supplied—and not only the British Army, but the American Forces. Under Mutual Aid Lend-Lease, Britain supplies all maps used by the United States Army and the U.S.A.A.F. in Britain or based on Britain, and most of the maps used by the United States forces in the Mediterranean theatre. The responsibility for map production and supply rests with the Royal Engineers, which has developed a widespread organization of highly-trained experts to do the job. One of the main jobs of Royal Engineers Survey in the fields is to supply, at short notice, accurate maps of any locality, and to provide them where, when and in the quantity needed. Every unit is equipped with a truck in which a complete photolith and rotary printing outfit is contained. The press prints in color at the rate of 4,500 copies per hour. At one point during the North African campaign, the Royal Engineers' mobile presses worked 22 hours a day, every day for six weeks without a break.—St. Thomas Times-Journal.

### Ran His Own Special

Naval Officer Borrowed A Train From Stationmaster In Sicily

They tell a story now about a naval officer who landed with invasion troops at Licata on the southern coast of Sicily and had to go to Syracuse 200 miles away. All railway traffic had stopped because the line ran too close to the fighting front. So the officer borrowed a train from the local stationmaster and ran his own "special". The officer was Lieut. G. S. Ritchie, D.S.O., Royal Navy, of Aberdeen. He had several ratings with him and some gear so, he said, "to go by train was the simplest way."

### TOUGH ON JAPS

In India the "Mosquito" fighter and reconnaissance bomber is being used over the Burmese rivers against the Japanese barges and other small craft and the result has been deadly. The mortality rate amongst these, already high, has been stepped up still further by this swift twin-engine monoplane.

The Oxford Committee for Famine Relief recently sent the Greek Red Cross \$14,000, most of which was used to buy cod liver oil for the suffering children in Greece.

### OUR COMPLETE SHORT STORY—

## Horseshoe—And Clover Leaves

By HELEN PARTICH

McClure Newspaper Syndicate

There was nothing in the day to cause apprehension—blue sky, thin high cloud puffs, and air like wine. But Lola gripped the car as it slid to a stop by the airport, and her eyes sought Benny's anxiously. "You won't be long?"

"About an hour. Sure you won't come along?"

"I can't." "Your mother had no right to make you promise. Everyone flies."

"I know. She'll feel better about it after a while."

"I hope so." Benny squeezed Lola's hand and hopped out of the car. "But you're going up with me soon. Can't have my wife grounded."

Lola flushed. Wife. Yes, she would be Benny's wife in a few weeks now. The thought brought color to her cheeks and a catch in her breath.

She said above the catch, "We—We couldn't drive over to Carlton Field, could we?"

"Worried? You couldn't be worried!" Benny's eyes were incredulous.

"N-o." Benny glanced hastily around, leaned into the car and kissed her. "Who cares?" he said, his own breath a little short. "Let 'em care!"

Lola watched him jump the fence and stride across the field. A plane was just taking off—a blue and silver plane—its occupants a boy and a girl in a red jacket. Lola had seen them climb into the cabin. The girl was laughing. Everyone took a plane in his stride. Everyone who could. There were four privately owned planes on the field in front of Lola now. Not Benny's. He would bring his from the hangar.

But he didn't. He came out and trotted back across the field. "Something's gone wrong," he said. "Pete found it when he fueled the bus and started to bring her out. They're working on her now. But I've got to make Carlton Field in fifteen minutes to meet Major Donley. Carl's taking me."

"Oh, Benny, I knew it!" "Knew what? It's just a minor matter. Anyway, I'm going with Carl. What's eating you, honey?"

"I don't know." Lola twisted her hands together. She didn't know. Except that she was acting silly. "Couldn't we drive over?"

"Twenty miles in fifteen minutes? Listen, sweetheart—"

Lola leaned forward. She had noticed something. A little gold pin on the lapel of Benny's coat was dangling. "Your pin! Benny, you didn't fasten the safety."

"Thought I did." Benny lifted a hand to the pin. Behind him on the field Carl's gangling figure was clumping into the cabin of his plane. Benny said, "Got to be going, sweetheart."

Lola called after him, "Don't lose the pin, Benny." She tried to fix her mind on it, a tiny horseshoe and two four-leaf clovers. Tried to remember the day she had given it to Benny, fastening it to his coat with fingers that shook a little because his face was so close, and because he had just kissed her, his lips warm and eager on her own.

She heard the engine of Carl's plane sputter, stall, catch. She watched the plane wobble across the field, gain speed, rise—slowly, slowly—and take to the air. She thought, I'm a crazy fool. There is nothing to worry about. Everyone is careful. Benny's ashamed of me.

She turned on the car radio. "Pools rush in . . . Open your heart

and let this fool rush in." She shut it off.

The blue and silver plane had come back. The boy got out, and the girl with the red jacket. She was still laughing. She stooped and picked up something. She held it in her hand as she came towards the car. She said to the boy, "Cute little thing. I wonder whose it is?"

Benny's pin! Yes, it lay in the girl's hand, a little horseshoe and two four-leaf clovers. Lola called apologetically, "I guess that's my pin. At least—"

"Oh!" The girl came over and gave it to her. "Glad I found it." Lola fastened it on her coat. She looked at the clock. Only twenty minutes! She turned on the radio again, then shut it off. What on earth was the matter with her?

Less than an hour had passed when she heard Carl's motor. It was skipping badly. The engine died, then caught and held with all cylinders firing freely. Lola would know that black plane with the silver wings anywhere. She shielded her eyes and watched it. How silly she had been. How silly!

And then it happened. One minute the plane was in the air. The next it hurtled towards the ground. It crashed nose down, far out on the field, and turned over on its side. Someone screamed. Spectators ran towards the plane. Lola ran with them. It was she who had screamed. The sound echoed in her ears, and the sickening crash of the plane. They pulled someone from the cabin. A single man. The plane burst into flames. Lola went down. Right there in the middle of the field.

Lola watched her. Carl was with her. He was calling her name distinctly. "I'm all right, Lola. And Benny is back at Carlton Field."

"At Carlton Field . . . ?"

"Yes. He lost a pin or something, and wanted to look for it. He sent me back to tell you to pick him up in the car. He was afraid you would worry if we were away too long."

Lola's eyes slipped to the burning plane. It was all too apparent what might have happened to the man pined on the lower side. Her hand slipped to the pin on her shoulder. It rested against her palm—a tiny gold horseshoe, and two four-leaf clovers.

### Canada's Food Rules

The Vitamin C Values Of Available Foods Are Compared

Canada's food rules call for one serving of tomatoes or citrus fruits or their juices every day. These are the food which are the best year-round sources of vitamin C and one serving supplies more than half the day's needs. The rest of the day's supply of this vitamin comes from the other servings of vegetables and the one serving of other fruit, prescribed by the food rules.

If it is not possible to use citrus fruits or tomatoes daily, extra servings of vegetables and other fruits will help make up the lack. To show how green or wax beans with citrus fruits in vitamin C value, Nutrition Services at Ottawa has worked out the following comparisons:

A value of 15 has been set for one serving of citrus fruit or tomatoes and on that basis extra servings of the fruits and vegetables listed have been given comparative values.

One-half cup apple sauce; 3; two small bananas 3; 3/4 cup cooked black currants 15; 3/4 cup cooked broccoli 15; 1/2 cup kale 10; 4 rounded table-spoons cooked cauliflower 5; 3/4 cup cooked or raw cabbage 5; 3/4 cup cooked green or wax beans 5; 3/4 cup cooked peas 5; medium baked potato 5; (a boiled potato counts only 3, while the same potato mashed doesn't even rate!); 1/2 cup cooked squash 5; 3/4 cup cooked turnips 5; 3 large raw turnip sticks 3; 3 strips of parsley 3; 4 large radishes 3.

### Must Assume Cost

People Will Have To Supply Money For Social Security Plans

The finding of the money for all these social security plans with whom our advanced thinkers are presenting is not as simple as some people suppose. The Government, contrary to a wide, vague general impression, has no money of its own. The Government's money is the people's money; and all the cost of these plans and blueprints for our well-being, no matter how good they may be, must come out of our own pockets—out of pockets already pretty well emptied by the searching hand of Caesar.—Ottawa Journal.

### HARD TO BEAT

Housewives of Knodishall, England, population 469, have challenged the rest of Britain to beat their knitting record, per population. They have knitted 7,363 garments for the three services and made 103 garments for hospital patients.

### High Potato Yields

British Columbia Grower Produced 900 Bushels Per Acre

The distinction of having grown what is considered to be the highest yield of potatoes per acre ever obtained in Canada—900 bushels per acre, of which 883 bushels were of marketable grade—goes to Leslie Gilmore, R.B. 1, Stevenson, B.C., when he took part in the 1943 potato competition of the Columbia Potato Growers' Association, Lulu Island, British Columbia. The Association has held these competitions annually for the past 20 years with the object of benefiting the potato industry at large by increasing yield per acre, quality, and demand, and by obtaining more uniformity in type.

These annual competitions are assisted by persons interested in improving the potato crop and by officials of the Dominion Department of Agriculture who also act as judges and verify the yields. In 1943 competition, the members of the Association in general obtained the highest yields per acre they ever had. Also the quality of the crop was much above average. The variety for the competition was "Netted Gem" which is popular in British Columbia and in several of the Western States. It has been grown commercially in British Columbia and Alberta for the past 40 years. "Netted Gem" is not considered to be one of the highest yielding varieties, hence the 1943 record yield is all the more outstanding. Incidentally, the fancy wrapped and boxed potatoes imported into Canada and sold as "Idaho Bakers" are the same variety as "Netted Gem".

### SELECTED RECIPES

**SMALL FUDGE CAKE**  
1/2 cup butter or shortening  
2 (1-oz.) squares unsweetened chocolate, grated  
1/2 cup sugar  
1/2 cup corn syrup  
1/2 cup water  
1 egg, unbeaten  
1 teaspoon vanilla  
1 cup sifted pastry flour  
1/2 teaspoon salt  
1/2 teaspoon baking powder  
1/2 cup sour milk

Melt butter in top of double boiler; add grated chocolate. When melted, add sugar, corn syrup and water and beat until blended. Remove from heat and cool. Add unbeaten egg and vanilla; mix thoroughly. Add sifted dry ingredients alternately with sour milk. Pour into a pan 8" x 8" x 2" lined with waxed paper, bake in moderate oven (350 degrees F.) for 35 to 40 minutes.

### NEW LABOR ACT

Hon. Charles Daley, labor minister, introduced into the Ontario legislature the Labor Relations Board Act, 1944, under which the new dominion war industry labor code will be applied to all industry in Ontario except farming, domestic servants, police forces, the hydro electric power commission and municipal bodies.

Spectacles were invented by a monk in Florence, Italy, in 1335.

### Wonder Drug

Research Workers In India Have Evolved Quicker Method Of Producing Penicillin

Penicillin "The Wonder Drug" has reached India. Capable research workers have evolved a quicker growing method in India which takes a quarter of the time hitherto taken in laboratories elsewhere. Wheat-bran, is the secret of their success. It has now been discovered that the penicillin growth on a wheat-bran medium has an average activity of 30 Oxford units per gramme, whereas the mould produced from sugar or glucose solution, the method used in western laboratories, yields only three to four units per cubic centimetre.

### This Week's Pattern

By ANNE ADAMS

It's young, it's new, it's a sensation . . . this willow-slim dream frock that is so easily made, you can whip it up in spare moments. Pattern 4697 has that soft back skirlfulness the fashion magazines are raving about. Of course the perky cup sleeves are not set in.

Pattern 4697 is available in junior miss sizes 11, 13, 15 and 17; misses' sizes 12, 14, 16, 18 and 20. See pattern for yardages.

Send twenty cents (20c) in coins (stamps cannot be accepted) for this pattern. Write plainly Size, Name, Address and Style Number and send order to: The Anne Adams Pattern Dept., Winnipeg Newspaper Union, 175 McDermott Ave. E., Winnipeg, Man. "Because of the slowness of the mails delivery of our patterns may take a few days longer than usual."

## THERE ARE MORE GOOD REASONS FOR BUYING WAR BONDS THAN FOR BUYING ANY SINGLE THING EVER OFFERED TO THE CANADIAN PEOPLE

EVERYONE of us wants to win this war—to see peace  
restored—to have jobs to get back to when the war is won.  
MILLIONS of us, already in the Armed Services have  
dedicated time, effort, lives if need be, to the Nation.  
The rest of us have not been called to arms. Our big  
chance to get into the fight is to buy the Sixth War Loan  
to the absolute limit.

This is the People's Loan, and we, the People, will not  
fail—

We will not fail to buy Bonds—and keep them.  
We will not fail to buy Bonds—and so help to keep  
Canada the kind of land they want to see when they  
come home.

REMEMBER—We are lending not spending.

The money we lend is still ours to use in the years  
ahead when we need it most.

Buy for PATRIOTISM . . Hold for Security

Space donated by the  
BREWING INDUSTRY OF ALBERTA

Good Government can always be traced to some-  
body's good morals.

No one is quite so unhappy as the person who  
always has his own way.

It is easy to think of reforming the world.  
We seem to have so small a part to play in it. It  
is harder to think of reforming ourselves in which  
we would have to play the principal role.

No amount of cleverness adds up to  
greatness. Talent is no substitute for character.

## LOCAL NEWS

Mr. Hamilton of Calgary  
arrived here last week and is  
employed by Cooley Bros.

Miss Jessie Schmidt who is  
teaching in the Coronation  
district, spent the Easter vaca-  
tion at the home of her  
parents, Mr. and Mrs. N.  
Schmidt.

Mrs. W. Wilson arrived  
home Sunday a.m. from Cal-  
gary where she had gone for  
treatment to the Clinic.

Mrs. Lorne Proudfoot left  
last week for Calgary and also  
for Three Hills, where she  
will visit with her sister, Mrs.  
J. C. Long

Mr. Paul Seeger went to  
Calgary last week where he  
will receive medical treatment

Mrs. Dan Anderson returned  
from Calgary Wednesday  
after having visited with her  
daughter.

Miss Cathlene Proudfoot  
who is teaching in Calgary  
spent the Easter vacation here  
at the home of her parents,  
Mr. and Mrs. Lorne Proud-  
foot.

Mrs. P. Peterson returned  
from Calgary on Wednesday  
after having spent a week  
with friends.

## Income Tax Returns FOR 1943 MUST BE IN NOT LATER THAN 30TH OF APRIL 1944

### 1. WHO MUST FILE RETURNS?

If you are single, and your income was over \$660.00—  
Or, if married, and your income was over \$1,200.00—  
Or if you had tax deducted in 1943—you must file returns.

### 2. WHAT FORMS TO USE

For income under \$3,000.00 use Form T.1 Special.  
For income over \$3,000.00 use Form T.1 General.

### 3. WHERE YOU CAN GET FORMS

You can get income tax forms from—  
1. Post Offices.  
2. District Income Tax Offices.

Your early co-operation is requested. Over 2,000,000 Canadians  
will be filing income tax returns. You can help by getting your  
forms now, and mailing them promptly.

It is important that income tax returns be filed promptly. First,  
these returns must be filed to obtain credit for tax deductions.  
Second, to claim any refund to which you may be entitled. Third,  
to establish the Savings Portion of your tax, which will be paid back  
to you with interest after the War.

Make your returns now, but not later than 30th of April  
to avoid a penalty of 5% of your tax.

The unpaid balance of your 1943 tax may be paid any  
time before 31st of August WITHOUT PENALTY.

### GET YOUR "T.4 SLIP" FROM YOUR EMPLOYER

To get a record of your 1943 earnings and tax deductions, ask  
your employer for a copy of the "T.4 Slip" he filed with the Govern-  
ment. Do this. It will save you time, and help prevent errors.

DOMINION OF CANADA—DEPARTMENT OF NATIONAL REVENUE

## INCOME TAX DIVISION

COLIN GIBSON  
Minister of National Revenue

C. FRASER ELLIOTT  
Deputy Minister of National Revenue for Taxation

Word has been received by  
his parents that L. A. C. Jim  
Wilson arrived overseas.

Mrs. McKeage and baby  
are visiting with her parents,  
Mr. and Mrs. L. Robinson.

Mrs. Jack Lee who has been  
with her husband at Vancou-  
ver for some time arrived here  
last Saturday.

Miss Randale spent the  
Easter vacation at her home  
at Blackie.

Miss G. Edler was a Cal-  
gary visitor at Easter time.

The Ladies Card Club met  
at the home of Mrs. Gingles.  
Prize winners were Mrs.  
Wilson and Mrs. Robinson.  
The club will meet next  
week with Mrs. Wilson.

**SEEDTIME  
and  
HARVEST**  
By  
DR. E. W. NEATBY  
Director  
Line Elevators Farm Service.  
**SERUBS**

"Ornamental Shrubs and Small  
Trees for the Canadian Prairies"  
is the title of a new bulletin just  
published by Line Elevators Farm  
Service. The author of this bulle-  
tin is Dr. S. W. Edgecombe,  
Associate Professor of Horticulture,  
University of Manitoba. It is a  
very attractive publication contain-  
ing descriptions of over a hundred  
shrubs and it is beautifully illus-  
trated.

Farmyards and school grounds in  
the Prairie Provinces are, too often,  
drab indeed. Shrub plantations are  
not difficult to establish and require  
comparatively little labour to main-  
tain. This new bulletin includes the  
essential information on planting  
and care of shrubs and, also, on  
planning the shrubbery. The reader  
can, therefore, make an intelligent  
selection, and secure information on  
landscape design as well as on care  
and maintenance. A list of com-  
mercial nurseries is, also, included.  
Copies of the bulletin may be  
obtained from Line Elevators grain  
buyers, or from Line Elevators  
Farm Service, 703 Grain Exchange  
Building, Winnipeg, or 305 Herald  
Building, Calgary. The distribution  
is free to farmers, country school  
students and their teachers. This  
will be a very valuable addition to  
the parcels of agricultural literature  
which go from Line Elevators Farm  
Service to country schools almost  
every day.

## THE CONFUSED ISSUE

Continued from page one  
which gave Oyen the prefer-  
ence over Cereal as the hos-  
pital site.

The mill rate of 2½ is most  
attractive when one considers  
that in good districts 8 to 12  
is found necessary to run  
municipal hospitals. Do not  
let this confuse the issue

Since the Oyen people hope  
to get something they want  
badly they will all vote. If  
you want to keep what you  
have you must vote, and vote  
NO for the scheme.

A Local Supporter

# ADDRESSES ON THE MOVE... IN SPITE OF ALL WAR HAZARDS 31,500,000 LETTERS REACHED YOUR MEN OVERSEAS LAST YEAR

DO you remember the "Change of Address" form which  
you filled out when you moved your civilian home? After  
that was filed at your local Post Office, every letter sent to your  
old address had to be redirected to the new one, and that went  
on until your correspondents were familiar with your new  
location.

Probably you didn't move very often, but each time you  
did, the Post Office gave redirectory service. And if you will  
think about that for a moment, you will begin to see what a  
stupendous task confronts the Canadian Postal Corps in han-  
dling the military mails, when thousands of men are being  
moved almost daily!

Yet, in spite of the need of tracing men from reinforcement  
units to their locations on fighting fronts . . . in spite of the  
need of tracing them through hospitalization . . . or while  
on leave . . . when their unit is moved . . . in spite of delays  
in air mail service caused by adverse flying conditions . . . of  
delays in surface transportation caused by enemy action . . .

in spite of every war hazard you can think of . . . your Post  
Office and the Canadian Postal Corps delivered 31,500,000  
letters to men overseas in 1943!

It is inevitable that, in tracing men who have been moved,  
or wounded, some delays occur. It is inevitable that enemy  
action holds up delivery in some cases. But everything that  
human ingenuity and effort can do to give you a service that  
means speedier delivery of the letters your men are waiting  
for, is being well and thoroughly done, and will be done. New  
methods of speeding mail deliveries are being put into effect,  
new possibilities are being studied. Think of your own friends  
who have been posted to new locations overseas, and realize  
the task of tracing them when their mail arrives at their former  
address!

You can help your Post Office and the Canadian Postal  
Corps to give even better service if you will take a moment to  
make sure that your mail is correctly prepared. Do these simple  
things . . .

1. Always be sure each letter or parcel (properly packed) is fully and correctly addressed.
2. Use light-weight paper for regular Air Mail, or use the Armed Forces Air Letter Forms. Airgraph letters take a little longer because they must be processed in Canada and overseas.
3. To men in hospital, mark your letter "In Hospital", if you are advised to this effect.
4. Never put into parcels perishable food, or any substance that can be damaged by extremes of temperature.

**SEEDTIME and HARVEST**  
By  
DR. H. V. NEATBY  
Director  
Live Elevators Farm Service  
"Dugs" in the Grain Dins

Seven or eight years ago, a distinguished authority on insects stated that, in Western Canada, we need never worry about insect damage in our stored grain. Most authorities are occasionally wrong, and he was no exception.

It is not our purpose to spread false alarm, but merely to draw attention to the defensive measures of our disposal. In guarding against losses due to insects in farm stored grain, we have three powerful allies, grain, we have three powerful allies. They are: a cold climate, a dry climate and a very efficient Division of Entomology in the Dominion Department of Agriculture. Despite these advantages losses have been suffered and will continue unless the necessary precautions are observed.

The best prevention against loss is storing only dry grain, and keeping it dry by means of ventilated granaries which exclude rain and snow and which are constructed so as to provide an air space between the floor and the ground. As added insurance, it is wise to bin grain during cold weather or move it and, if possible clean it, during very cold weather.

If storing tough grain is unavoidable, it should be examined regularly and, at the first sign of heating or infestation by mites or insects, it should be run through a fanning mill, threshing machine or combine.

All Live Elevator agents have copies of a Dominion Government booklet on this subject, and, also, the "Seedtime and Harvest" leaflet which gives more detail than space allows here.
